ACCESSORIES

The following items are supplied with the projector and please check:

Name	Quantity	Unit	Remark
G clamps	2	Pcs	
XLR connector	1	Set	Male and female
Safety cord	2	Pc	
Spare gobos	4	Pcs	
User manual	1	Pc	
Ω clamps	2	Pcs	Optional

Please note that as part of our ongoing commitment to continuous product development, specifications are subject to change without notice. Whilst every care is taken in the preparation of the manual we reserve the right to change specifications in the course of product improvement. The publishers cannot be held responsible for the accuracy of the information herein, or any consequence arising from them.

Every unit is tested completely and packed properly by the manufacturer. Please make sure the packing and / or the unit are in good condition before installation and use. Should there be any damage caused by transportation, consult your dealer and do not use the unit. Any damage caused by improper use will not be assumed by the manufacturer and / or dealer.

Any future technical changes in the user manual won't be with any further notice.

Note: For the products made by Guangzhou PR lighting Ltd, the warranty for the whole product is one year starting from

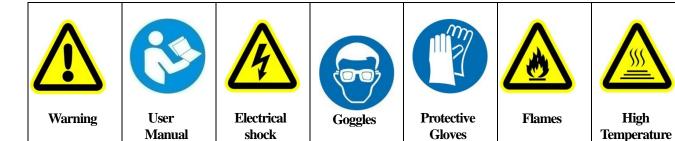

1. SAFETY AND WARNINGS

NOTE

Before a projector's installation, power-on, operation and maintenance, please carefully read the safety information hereinafter!

The following safety signs are used in the user manual.

·When unpacking, check if there is transportation damage before using the projector. Should there be any damage caused by transportation, consult your dealer and do not use it.

High

- •The manufacture is not responsible for loss caused by the user not following the manual or changing the projector as he/she likes.
- •Please be noted that the damage caused by changing the projector at will is not warranted.
- Do not hesitate to contact the dealer or the manufacturer if any questions or advice.

- The projector is for indoor use only, IP20.
- •Use only in dry locations. Keep this unit away from rain and moisture, excessive heat, humidity and dust. Do not allow contact with water or any other liquids.
- •The projector should be kept away from high temperature, fire, electrical surge, vibration and strong light while being operated.
- •The projector is only intended for installation, operation and maintenance by qualified personnel. And the operation must strictly follow the procedures in the manual.
- •No repairable parts in the projector and do not open covers for maintenance by yourself.

- •Don't look straightly into the light sources especially for epileptics, otherwise eyes will be burned...
- •Do not connect this device to any type of dimmer pack.
- •After lamp switched on, the minimum distance between the projector and illuminated surface is 10m.
- •lens and other optical parts shall be replaced immediately if they have deformed or been damaged, otherwise the light output will be compromised.

- •Before operation, please confirm that all covers(housing) are on and screws tightened. It's forbidden to use a projector while covers(housing)are off.
- •Keep the lamp clean and do not touch it with bare hands.
- •While operating it, wear protective items.

- •Any electrical connection must be carried out by a qualified person .
- •Before installation, please confirm the voltage supplied matches what is required for the projector.
- •Each projector must be properly earthed and installed as per related electrical standards.
- •Do not use power cord with its insulator damaged and connect the power cord with other cables.
- •If the projector is not used or under cleaning,, please hold the plug and unplug it. Do not unplug it forcefully or by pulling the power cable.
- •All power cords must conform to related safety and regulations.
- •While being operated, the projector should not be under rains or in humidity.
- •Do not switch on and off the projector constantly in very short intervals, otherwise the light source's and other electrical parts' life will be shortened.

- •There are safety cord holes at the bottom of the base of a projector. In view of safety, please run the safety cord supplied through the safety cord holes for safety support.
- •Before any installation, maintenance and cleaning work, please ensure the projector is disconnected from power mains.

- •After running for 5 minutes, the temperature of the housing of the projector is 80°C . After stable operation , its temperature is 170°C .
- •While the lamp is stricken for the first time, there will be smoke and strange smell. It's normal and does not mean the projector has some defects.

•Do not mount the projector directly on inflammable surface.

- •Do not project the beam straightly on combustible items and the minimum distance between the projector and illuminated items is 10m.
- •A projector should be installed with good ventilation and the minimum distance between the projector and walls is 50cm. At the same time, please ensure the fans and air inlets and outlets are workable.

2. INSTRUCTIONS

CLEANING AND MAINTENANCE

If a projector can't start. Please check if the fuse is blown up. If it does, replace it with a new fuse with same ratings. And the projector has over-temperature protective device. If the temperature is too high, the protective device will be triggered to shut the projector off. When it happens, please check if the fans run normally or fan shield is blocked by dust. After the issue is solved, restart the projector.

The accumulation of oil, smoke and dust on the lens will compromise the light output. Cleaning a projector is very necessary to ensure a reliable use of it. Cooling fans need to be cleaned every 15days. Internal lens, reflector and hot mirror need to be cleaned periodically to optimize light output.

Cleaning frequency is to be decided by operations and its environment. Use soft cloth and normal detergent for glass for cleaning work. It's advised external optical system be cleaned every 20days and internal optical systems every 30/60days. Keep lens clean and do not touch optical parts with bare hands.

- •Before any maintenance and cleaning, please ensure the project is off the power.
- •Only qualified person is allowed to do maintenance.
- •During maintenance and before maintenance, the projector must be off power.

- •To avoid internal damage, sun light or other light mustn't penetrate into the projector via front lens whether it runs or not.
- •Do not use alcohol or other organic solvent to clean the housing to avoid damage.
- •Do not use any solvent with chemical elements to clean color filters or hot mirror.

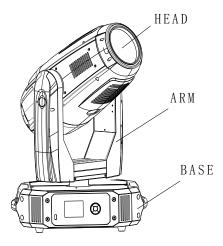

JUBRICATION

To ensure smooth movement of gobos and zoom and focus lens, it's advised rotators' bearings and 2 sliding bars for zoom and focus lens be lubricated every 2 months. High quality and high temperature lubricant/grease is advised..

•TROUBLESHOOTING(Details vary with different projectors)

PROBLEM	ACTION
The projector doesn't switch on	Check the fuse on the power socket.
· r · J·····	Check the lamp.
The lamp is on but the projector doesn't respond	➤ Make sure that the fixture's start address is right
to the controller	Replace or repair the XLR signal cable.
The projector functions intermittently	Make sure the fan is working well or fans and their shields are not blocked
Beam appears dim, Low in brightness	➤ Make sure the lamp is within its lifespan
Beam appears unit, Low in originaless	Remove dust or grease from the lenses.
The project image appears to have a halo	Carefully clean the lamp, optical lenses and other components.
Haavily Defective Room	➤ Check if lens are in good condition(not cracked)
Heavily Defective Beam	Clean dust or grease on the lens.

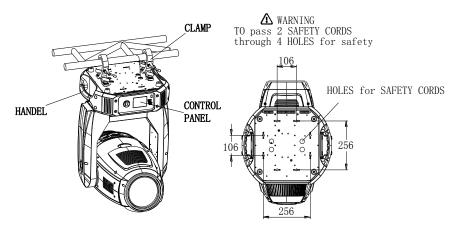

3. APPEARANCE

4. INSTALLATION

.RIGGING

Before moving a projector, Please lock Pan and Tilt. Before its operation, please unlock them. It's forbidden to run a projector with power while it is locked.

Take 2 clamps and the safety cord out from the package and mount 2 clamps on the underside of fixture with 2 retainers attached to each clamp. Hang the fixture on the structure and fasten the screws attached to each clamp. (See the <u>WARNING</u> on the underside of the base as shown above) <u>To pass the SAFETY CORD through the HOLES for safety!</u> Always ensure that the projector is firmly anchored to avoid vibration and slipping whilst functioning. Always ensure that the structure that you are going to mount the projector to is secure and strong enough to support the weight of a XR 1000 Framing.

WARNING:

- •The projector MUST be lifted or carried by the HANDLES instead of clamps.
- •. For safety the safety cord should afford 10 times the Projector's weight.

POWER CONNECTION

Connect the power cord as follows:

L(live) =brown

E (earth) = yellow/green

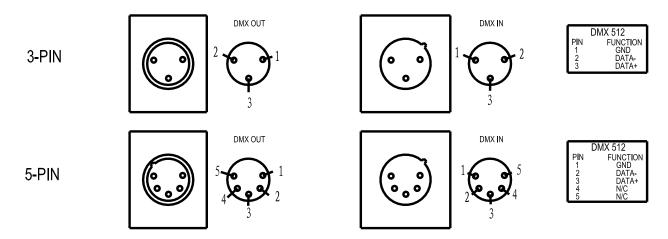

N (neutral) =blue

Before power connection, please ensure the power supplied must match what the nameplate says. It is recommended that each projector be connected with power separately so that they may be individually switched on and off.

- •The earth wire(yellow/green) must be connected to the ground. And electrical connection must be in accordance with the standards concerned.
- •If any questions about the electrical installation, do not continue but consult a qualified electrician.

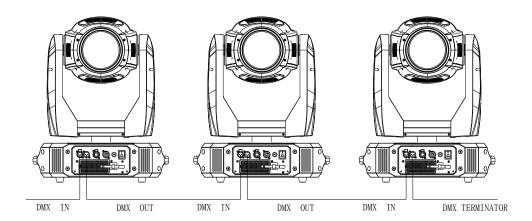

.DMX CONTROL CONNECTION:

Connection between controller and projector and between one projector and another must be made with a twin-screened cable, with each wire having at least a 0.5mm in diameter. Connection to and from the projector is via cannon 5 pin (which are included with the projector) or 5 pin XLR plugs and sockets. The XLR's are connected as shown in the figure above.

Note: care should be taken to ensure that none of the pins touch the metallic body of the plug or each other. XLR plugs and sockets mustn't be connected in any way other than mentioned in the above figure. The XR330BWS accepts digital control signals in protocol DMX512 (1990).

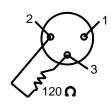

Connect the controller's DMX output to the first fixture's DMX input, and connect the first fixture's DMX output to the second fixture's DMX input and connect the rest fixtures in the same way. Eventually connect the last fixture's DMX output to a DMX terminator as shown in the figure below.

.DMX TERMINATOR

In the Controller mode, at the last fixture in the chain, the DMX output has to be connected with a DMX terminator. This prevents electrical noise from disturbing and corrupting the DMX control signals.

The DMX terminator is simply an XLR connector with a 120Ω (ohm) resistor connected across pins 2 and 3, which is then plugged into the output socket on the last projector in the chain. The connections are illustrated below.

DMX TERMINATOR CONNECTION

Connect a 120 Ω(OHM) resistor across pins 2 and 3 in an XLR plug and insert into the DMX out socket on the last unit in the chain.

•ALIGNMENT/INSTALLATION/REPLACEMENT OF A LAMP

Before installation/replacement/alignment of a lamp, disconnect the unit from the power and let it cool first.

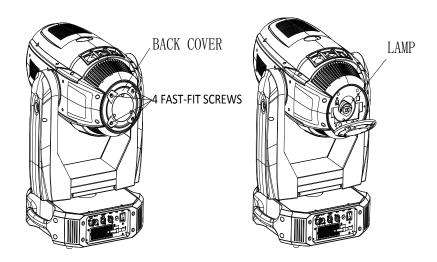

Lock Tilt in the figure below and open the lamp cover after its 4 screws are loosened.

After removal of the lamp cover, turn the lamp anti-clockwise and take it out of the ceramic stand..

Insert a new lamp. Note: while placing a new lamp, do not touch the burner of the lamp with bare hands, otherwise the light output will be compromised.

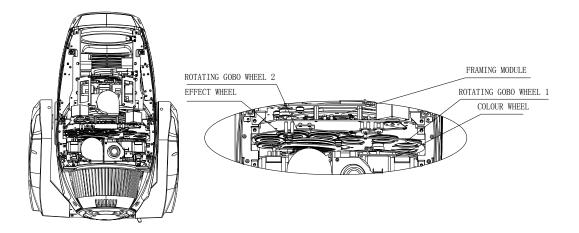

Fasten the 4 fast-fit screws after the lamp cover is on

Important: The unit uses high voltage discharge lamp with external igniter(). While using the lamp, please carefully read "INSTRUCTIONS" packed with the lamp.

- •Don't touch the internal surface of the reflector and the burner of the lamp with bare hands so as not to impair the beam output. While lamp's installation, do not damage the metal wire around the burner.
- •Please read "Instructions" enclosed with the lamp
- •Do operate the projector while adjusting the lamp
- •GOBO REPLACEMENT

Lock the tilt and loosen the 6 fast-fit screws on the upper cover ,After removing the cover, you will see the structures as the figure below

Before replacing a gobo on the fixed gobo wheel, use your finger to remove the spring tightening it and take the old one out with due care. At last put the new into the wheel.

To replace a gobo on the rotating gobo wheel: take the rotator from the wheel, take the gobo out from the rotator by removing the tightening spring. Put the new gobo back to the rotator, then tighten it with the spring. Please ensure the spring is in the narrow location of the rotator, which is the internal ring of it and flatten it. At last, pull up the spring strip using proper tool and put the rotator back to the wheel with the assistance by another hand.

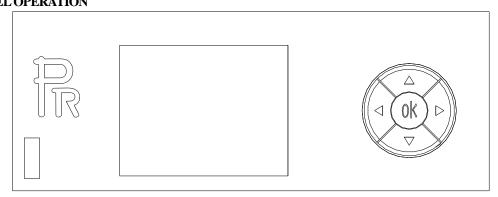

Note: Do not touch the glass gobo with bare hand. Place clean and soft paper or cloth between hand and glass gobos. Tighten 6 fast-fit screws after the cover is on. Unlock the tilt.

DANGER!

Before replacement of gobos, the projector must be off the power.

5. SETUPAND CONFIGURATION FRONT PANEL OPERATION

The projector configuration can be set conveniently via push buttons and color touch screen.

To browse through or change the projector 's settings, touch the white area of the touch screen or press OK button for more than 3s(Only powered by the battery, pressing the OK button) to unlock the screen , then press P key to enter the projector 's function menus. Each main menu has its sub-menus. And each menu stands for special function. For the details, please see the following 6^{th} point "Operation Menu"::

- 1. At the page to set the fixture's functions, press ◀,▶,▲,▼ keys or their respective icons to select the functions desired.
- 2. While at 2nd,3rd and 4th level of menus, the key is for ESCAPE, but key won't work, and OK key is used for ENTER. Press OK key to save the changes or enter into the sub menus. Press or keys to change the numbers(minus or plus). Or touch the option needed for change.

	<u>Ienu is</u> entered into, there are all options for the functions on the top of the screen. On	the
right there are 4 shortcut keys like	←, — Lamp Control and English/Chinese.	

DMX START ADDRESS

Each projector must be given a DMX start address so that the correct projector responds to the correct control signals. This DMX start address is the channel number from which the projector starts to "listen" to the digital control information being sent out from the controller. The projector has 3DMX modes. There are standard mode ,short mode and extended mode. For example standard mode has 39 channels, so set the No. 1 projector's address 001, No. 2 projector's address 040, No. 3 projector's address 079,No. 4 projector's address 118, and so on.

Switch on the Projector . Press OK key more than 3 seconds to unlock panel, then press key to enter into the fixture's operation menus

Select DMX Address icon and press OK key or touch the icon directly on the display and select DMX address at the 2nd level menu for the address setting.

Press ▲ or ▼ keys or touch<, >displayed for the DMX address desired.

Press OK key to confirm.

Press the ◀ key to go back to the upper level menu.

.DMX WIRELESS CONTROL

The projector has wireless control function with wireless receiver module and antenna for remote control.

The setup of it is below:

- 1. Press OK for more than 3s to unlock the control panel, then press ▶ key to enter into the operation menu and select "Config Settings".
- 2. Select "Wireless First" or "Wireless Only" from the menu of "Signal Select".

Only after the projector is linked with a transmitter, can it receive wireless signal sent by the transmitter. If unlinking it, Press "Enter" for the menu of Un-link Wireless under the upper level menu of Config Settigns, then the fixture is unlinked with the wireless transmitter.

•STAND-ALONE MODE

Operate the projector without connecting with a controller, enable the master mode through the operation panel, the projector will run in Stand-Alone mode automatically.

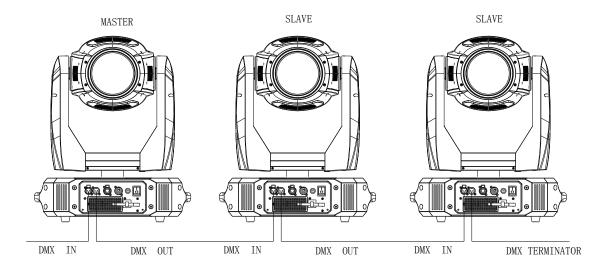

DMX address can be set at any number within 512.

•MASTER/SLAVE MODE

Many projectors can run synchronously in the Master/Slave mode by linking them with each other. First, connect the first fixture's DMX output to the second fixture's DMX input using XLR-XLR control cable and then connect the second fixture's DMX output to the third fixture's DMX input, and so on until all projector are connected in this way. Eventually connect the last fixture's DMX output to a DMX terminator. Set 1st projector as the master and others are Slaves.

Start Addresses of all Slaves are 001; Operation mode of the Master can be set any mode for a Master' and Slaves' operation mode can be set accordingly.

After Powered on, the group will run in Master/Slave Mode

•FIRMWARE UPGRADE VIA USB INTERFACE

Copy the .PRS file for upgrading to U disk and plug it into USB interface. The upgrading file name or its file folder can be seen via the USB firmware upgrading interface under menu SERVICE. Select the desired PRS file and tap the upgrading menu, then the system will show Please Waiting..., which means the file is being copied into the system. After that, the Bootloader interface will be entered into and the countdown 10s appear. Within 10s, if UP and DOWN keys are pressed at the same time, the system enters into firmware upgrade interface. During this process, the power supply mustn't be interrupted. If none key is pressed within 10s, the firmware upgrade interface won't be entered into.

- 1. The projector can't be turned on within 1 minute after the lamp-off.
- 2. Fan error can cause lamp-off.
- 3. "Speed Mode" means Pan and Tilt will move from Point A to Point B at their respective maximum speeds. "Time Mode" means both Pan and Tilt will arrive at designated point at the same time. It's advised Time Mode be used if the projector runs circles or in oblique lines.

CTO:

0-100% Linear CTO system

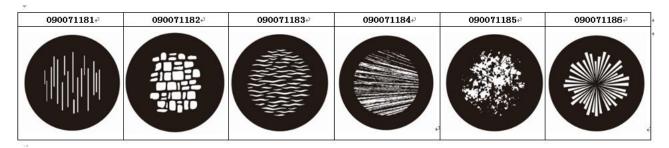

GOBOS:

2 Rotating gobo wheels, each 6 Interchangeable Gobos +Open, glass gobos or metal gobos

Bi-directionally rotatable, scrolling and shakable at variable speeds, indexing Rotating gobo wheel1

Rotating gobo wheel2

Gobo size: 37.3mm Gobo image size: 26mm

PRISM:

1pc of 6-facet circular prism+ 1 pc of 6-facet linear prism, bi-directional rotation with variable speeds, with indexing function;

FROST WHEEL:

2 frost wheels:1 heavy frost +1 light frost, linearly adjustable and both can overlap

EFFECT WHEEL:

Double effect wheels,
Each has independent and bi-directional rotation with variable speeds

FOCUS:

DMX linear Focus

DIMMER:

0-100% Linearly adjustable

IRIS:

5-100% linear adjustment with macro

STROBE

Double blade strobe, 0.3-25 F.P.S.

HEAD MOVEMENT:

Pan 540 °, Tilt 270 °with auto position correction

BEAM ANGLE:

Linear zoom $5 \sim 55$ with 16bit adjustment

CONTROL:

DMX512, 5 pin interfaces

RDM control protocol

32channels in basic mode, 39channels in standard mode , 46channels in extended mode

Self-test mode

OTHER FUNCTIONS:

Adjustable Pan & Tilt speeds

Lamp's and fixture's hours displayed

Color touch screen, Chinese and English menus, brightness and contrast adjustable

Input signal isolated

Modular Structure for easy maintenance

Ethernet interface

DMX512 wirless reciever

Optional DMX512 Wireless Transmitter

HOUSING:

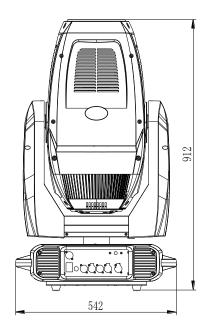

High temperature ABS, IP20

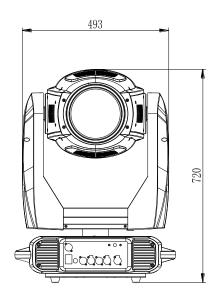

WEIGHT: 52Kg

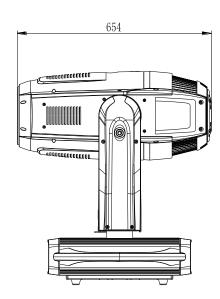

OPERATION TEMPERATURE:

Maximum ambient temperature: $40~\mathrm{C}$

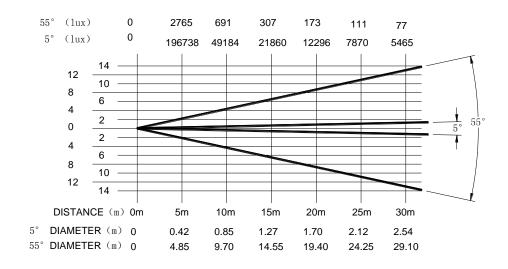

SIZES:

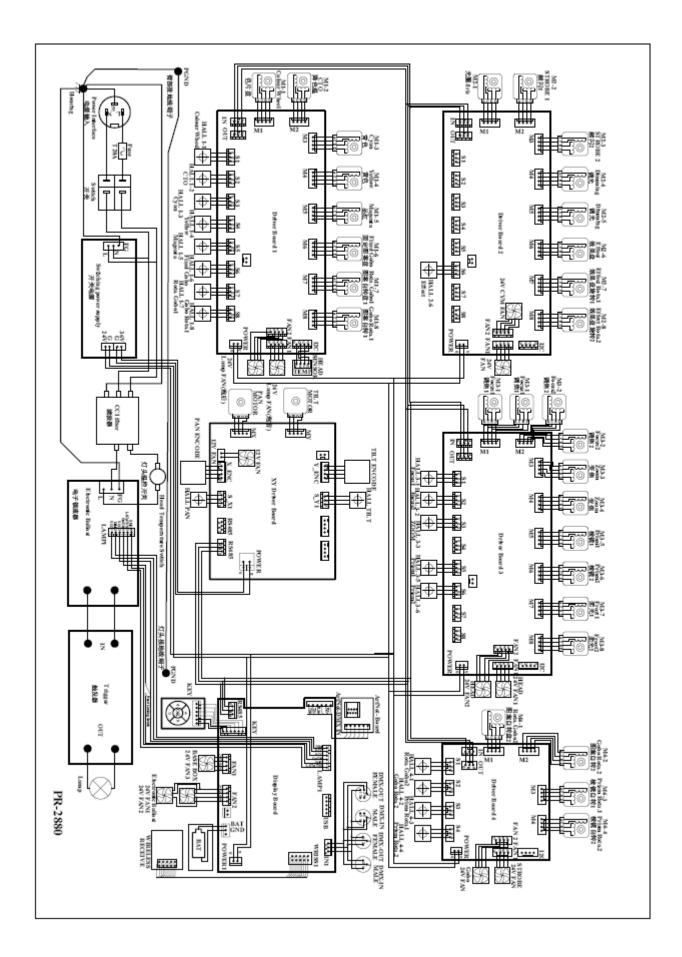

LIGHT OUTPUT:

POWER SWITCH	192010136	1	S-350-24
POWER FILTER	193020008	1	20A 115/250VAC
THERMAL SWITCH	190010150	1	250V-16A
ELECTRONIC BALLAST	040070133	1	1700W ELECTRONIC BALLAST
IGNITER	040090066	1	IGNITER
LAMP	100050085	1	LOK-IT! 1700W/PS OSRAM
PAN BELT	290151205	1	558-3M-11
TILT BELT	290151207	1	885-3M-12
PAN MOTOR	000040000	1	
TILT MOTOR	030040262	1	
COLOR WHEEL1 MOTOR	030040095A	1	
CTO MOTOR	0300400114A	1	
CMY MOTOR	0300400114A	3	
COLOR2 MOTOR	0300400023	1	
ROTATING GOBO WHEEL1 MOTOR	0300400095A	1	
GOBO ROTATION 1 MOTOR	030040084	1	
IRIS MOTOR	0300400088	1	
STORE MOTOR	0300400095A	2	
DIMING MOTOR	030040186	2	
EFFECT WHEEL IN/OUT MOTOR	030040095A	1	
EFFECT WHEEL1 ROTATION MOTOR	030040219	1	
EFFECT WHEEL2 ROTATION MOTOR	030040220	1	
FOCUS MOTOR1	030040221	2	
FOCUS MOTOR2	030040095A	2	
ZOOM MOTOR	030040261	2	
PRISM1IN/OUT MOTOR	030040221	2	
PRISM2 IN/OUT MOTOR	030040224B	2	
FROST IN/OUT MOTOR	030040220	2	
ROTATING GOBO WHEEL2 MOTOR	030040132A	1	
GOBO ROTATION 2 MOTOR	030040132A	1	
BASE FAN	030060104	5	
LAMP FAN 1	030060107	1	
LAMP FAN2	030060107	1	
CMYFAN	030060107	1	
HEAD FAN	030060106	2	
STROBE FAN	030060102	1	
GOBO FAN	030060106	1	
PAN AND TILT BOARD	230060604	1	
DRIVER BOARD 1	230060590	1	
DRIVER BOARD 2	230060672	1	
DRIVER BOARD 3	230060673	1	
DRIVER BOARD 4	230060589	1	
SCREEN	230060625	1	
POWER BOARD	230060488	1	

PR LIGHTING LTD.

1582 Xingye Avenue, Nancun Panyu Guangzhou, 511442 China TEL: +86-20-3995 2888
