AQUA LED1600-W BWSF(Four in One) is a moving head fixture using 700W LED white engine as its light source. It has high-performance brand light source, brand new optical lens with efficacy more than 60%, beam angle(5°-60°), very intensive beam with high CRI up to 96 and very good color rendition. It uses our many innovative technologies like continually rotating framing system, linear color temperature(1800K-6500K), brightness calibration, colors based on standard LEE color chart, auto-focusing, multiple dimmer modes, very quiet running and etc., realizing more professional and fantastic stage effects.
